WOMAN MADE	22 - 23
NOW BE HERE	25 - 26

CONCEPT

ACADEMIC PROJECT - CONCEPT

This project is focused on what is feminism and how it has been represented over the years.

This research is condensed into six books.

Feminism - Part 1 - The book where we understand the role of women and how much they have fought for the rights that we have today (voting, divorce, freedom of speech ...)

Gender bias and sexism - Part 2 - In this book, we discover the definition of gender and the reason for the prejudice between them. Here you can see in a psychological way how much this prejudice is still credited in our society today.

Women in History - Part 3 - Here, we will discuss the prejudice between women and men, especially in politics and at work. Until today we study the deeds that men have done to change humanity. However, there are very few cases in which we learn the acts in which women collaborated, usually in the 1920s, the suffragettes and Marie Curie's Nobel.

Feminist contemporary struggles - Part 4 - Here, you can see how much we have evolved over the years and how much the movements in which feminists participated. They have helped to improve the world today. However, we also represent those women who are still struggling today to have an impact.

The feminine mystique, Feminist art - Part 5,6 - here are some art projects, from literature to design projects, museums and art galleries

PROJECT PROJUE PROJECT

The history of feminism and its manifests hold significant influence in today's world. Without them, I wouldn't be speaking before you today, and many ignored minorities would still have no voice. However, there is still more we can do and should do to make this world an equal place for all.

Nowadays, we live in an internet ruled world. We use Google for everything, from searching what quote to use on an Instagram caption to what to answer in job interviews, so why not have an online tool that generates protest posters? My project proposal is a feminist online kit where users would find iconic manifest sentences and would be able to develop their iconic protest posters, ready and easy to print.

PROJECT WEEKS MANAGEMENT

1 — 4

Reflect on what was researched and start researching for more women who were not recognized because of society's prejudice

3 — 6

Start making graphical experiments and start creating the layout of the web-site.

7 — 12

I intend to make a site from scratch to be able to work with all the aspects that I belong to in terms of interactivity

13 — 16

Changes to the website and dossier
